Re: Backflow/RPZ Test Authorization Form

Annually your City/Village/Town requires an inspection of your Backflow Preventer Device per the State of Illinois code 890.113ob.

In most cases, you don't need to be home for this test. Based upon each individual City/Village/Town's testing date requirement, our plumber, who is a licensed Backflow inspector, will test your device annually to meet this deadline. If your test results are "passing," the Backflow device will be "tagged" with a certification report and the results will be faxed/emailed to your City/Village/Town's public works water department or whichever company whom is managing these results. A copy of these results are retained in our office.

If the Backflow device does not pass and repairs are necessary, then we will notify you of the approximate cost for repairs. If you authorize the repairs, then the Backflow device will be repaired and re-tested. There is no charge to you for re-testing of the device.

The reason for this letter is not only to explain this process again but to ask if you would like to continue to be on our "master annual inspection list". We also would like to make you aware since most of the Backflow device are located outside your home there will not be an appointment made for inspection. We want to make certain that you are aware the plumber will be on your property unannounced. If your device is located inside your home, please provide us with the best contact information for the plumber to schedule an appointment for access.

Please complete the bottom portion of this letter and return it to us. If you have made other arrangements with another firm to test the device, please contact our office immediately so you can be removed from our master list. Please fax, email or mail back the bottom portion of this letter. If this form is not received, then you will be removed from our master list effective 2016 and it will be your responsibility to have your Backflow device tested. If and when decide to cancel this service, it must be in writing to our office or you will be liable for payment for this service if it has been completed by our plumber.

Thank you for your business and your attention in this manner.

Antonio Ayala
